# SHARE OUR LOVE & KNOWLEDGE OF STONE

## STONE INDUSTRY DEVELOPED CLEANING SOLUTIONS

We have been quarrying, cutting, carving and caring for stone for over 30 years. Our senior team are revived for their knowledge and skills in their field,

**WE ARE STONE**, we love, breathe and know stone. Our Master Mason's have roots as far back as 1096.

We are one of only a few companies around the world that know how to care for modern quartz surfaces such as Caesarstone, Quantum Quartz, Cambria, Essastone, Smartstone, Silestone, Technistone and ALL OTHER BRANDS of QUARTZ.

We know how to care for any stone type from Granite, Marble and all types of Quartz Surfaces, whilst retaining their lustre and shine therefore making them easier to look after and maintain. WHY WOULD YOU TRUST ANYONE ELSE OR GOOGLE?

Most "stone fabricators" do not know how to care for stone and often recommend methods that actually do damage to the surface therefore making them dull, lifeless and easily stained.

The **NUMBER ONE** question all of our qualified stonemasons are asked many times per day "HOW DO WE CLEAN OUR STONE?" The answer was obvious, to make the products that our trained professionals use daily available to the general public.

Our cleaning products are developed by stone industry experts with years of experience and specialised knowledge. Proudly made in Australia and designed to work. 100% Money-back Guarantee

# ONGOING RESEARCH & DEVELOPMENT

Recognized at the forefront of Quartz Surface Repairs & Maintenance, we pride ourselves on having the best solutions for any stone or Quartz product used in modern kitchens.

After testing 99% of all General Purpose, Stone & Quartz cleaners on the market as of Nov. 2017 these are the FACTS & RESULTS;

## NOT ALL CLEANERS ARE SUITABLE FOR STONE OR QUARTZ

- Most simply don't work and at worse damage the gloss surface. **Note:** The gloss finish is *not a coating, sealer or anything similar*. It is a factory finish obtained from a special in-line polishing process. To repair this is extremely difficult, with very few companies having the technical skills to undertake these repairs.
- 99% of all commercially available cleaners are either highly acidic or worse alkaline with similar strengths of oven & drain cleaner. DO NOT use any product with a pH higher than 7.5 or lower than pH 6.
- The few that are suitable, DO NOT remove stains, streaks etc.
- Most cream cleansers considered safe for cleaning may cause dull spots and shadowing on modern quartz benchtops with an average pH level of 10.5+. (Same as some oven cleaners)
- Window Cleaners are also alkaline and will overtime, like orange based cleaners (acids), dull the surface making it stain more readily.
- Granite & Marble cleaners are not interchangeable nor are they suitable to be used on quartz benchtops.

## DO NOT USE

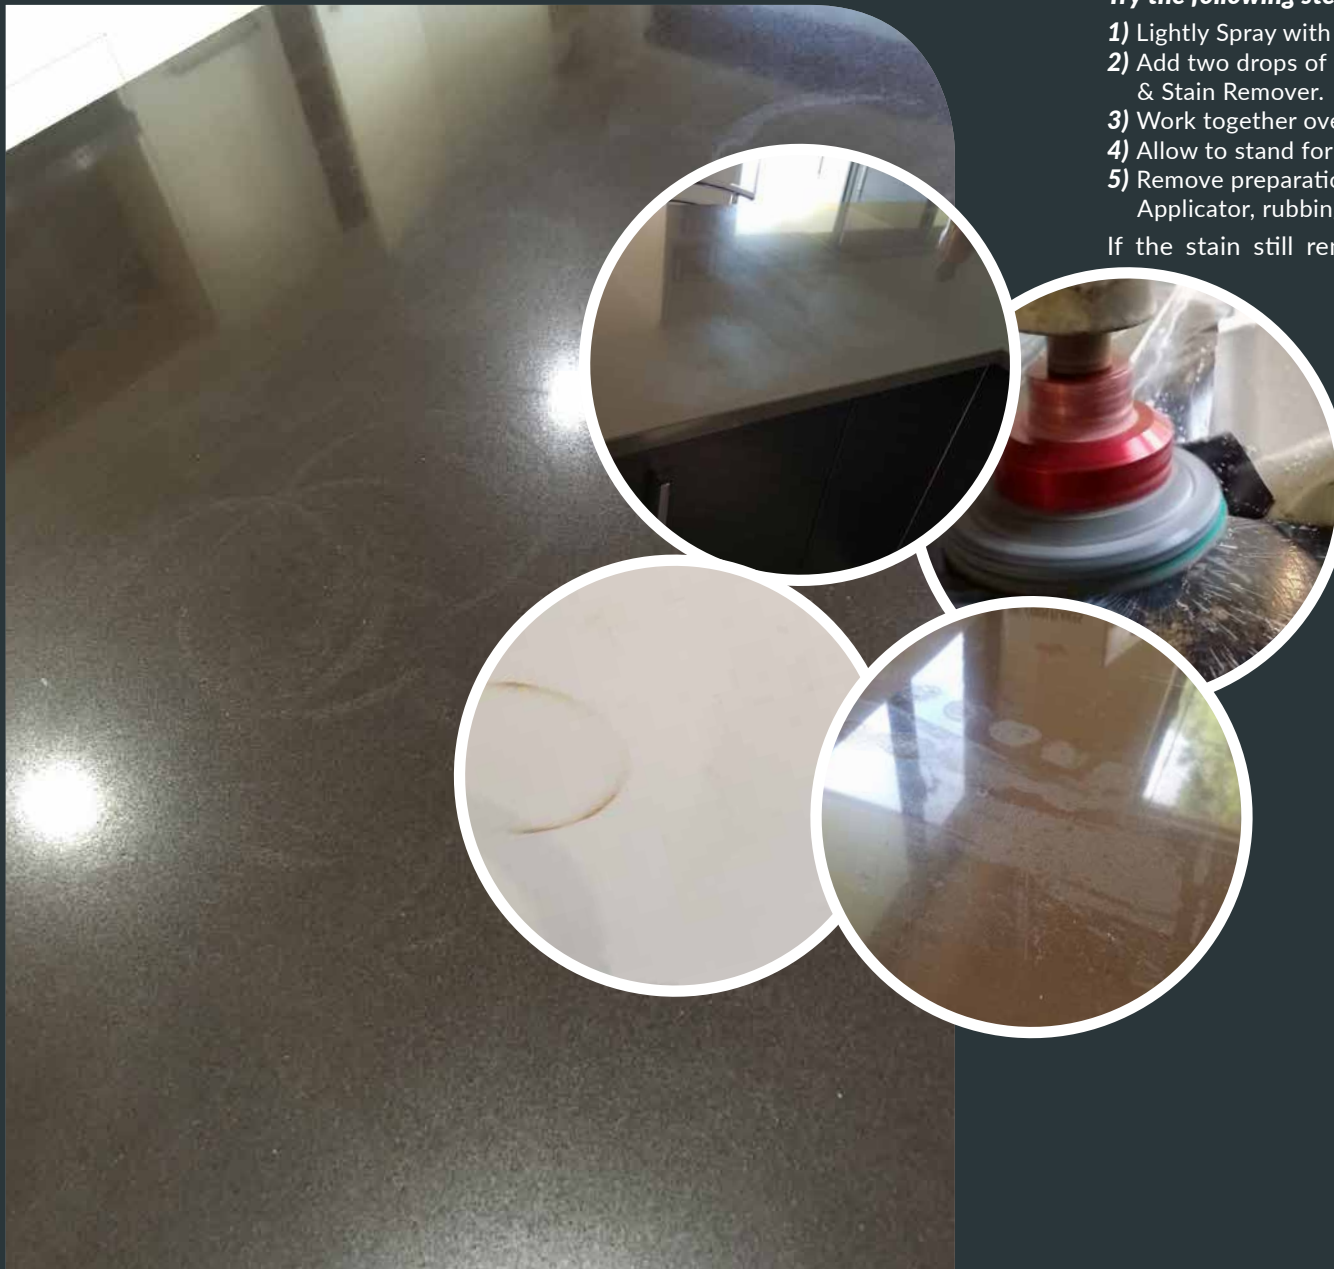

- GUMPTION or any cream cleanser
- Vinegar, Window Cleaners or Citrus based cleaners
- Products that contain any BLEACH or pH above 7.5

**WARNING!** - All cleaners over 7.5pH will **YELLOW** any lighter colored quartz product over time.

## WHEN A STAIN IS NOT A STAIN\*

Notice any of the STAINS in the photos? **YES?**

### Try the following steps:

- 1) Lightly Spray with Stone Power Cleaner
- 2) Add two drops of Gloss Renew & Spot & Stain Remover.
- 3) Work together over the stain
- 4) Allow to stand for 5 minutes.
- 5) Remove preparation with nanoTech Applicator, rubbing in a circular motion.

If the stain still remains, unfortunately

you DO NOT have a stain.

Circular rings in the main photo & the white quartz sub photo are both BURN or HEAT DAMAGE, from placing HOT items onto the surface, usually POTS & PANS.

Both CANNOT BE REMOVED by any DIY or home SOLUTIONS. TOP CENTRE cream cleansers & BLEACH damage with a HAZY or DULL noticeable to the surface. Bottom middle photo from OVEN or DRAIN cleaner.

### #1 Rule - DO NOT KEEP CLEANING!

*If our STONE POWER CLEANER will not remove or partly remove the "stain" it can not be removed. PROFESSIONAL repair will be required.*

**DO NOT TRY ANYTHING ELSE!**

### YOU WILL CAUSE FURTHER DAMAGE!

### #2 Rule - IF YOU CANNOT TOUCH IT DO NOT PLACE IT ON IT!

*Easiest & safest way is to place them on a wooden cutting board. This is for ALL HOT items, including pizza stones, casserole dishes, rice cookers, pots & pan, espresso makers etc.*

### SOME COMMON DAMAGING AGENTS

- BLEACH, CITRIC CLEANER, VINEGAR
- OVEN & DRAIN CLEANER
- CREAM CLEANSERS, MAGIC ERASERS
- pH CLEANERS above 7.5 or below 6

**Note:** The gloss finish is *not a coating, sealer or anything similar*. It is a factory finish obtained from a special in-line polishing process. To repair this is extremely difficult, with very few companies having the technical skills to undertake these repairs.

## ✓ General & Everyday Cleaning

- Lightly spray with **STONE POWER CLEANER** & using a gentle figure “8” action wipe away with the nanoTECH cleaning cloth.
- For quartz that has been previously cleaned with other products, just clean the surface as above two to four times to remove all germs, containments and detergent deposits. You will see your **SHINE & EASE** of cleaning return.
- We **HIGHLY RECOMMEND** using a clean nanoTECH cloth - Machine wash with **NO FABRIC SOFTENER**
- Safe on **ALL STONE** including **QUARTZ**
- Safe on **ALL FINISHES** - matte & polished
- Prevents Fingerprinting & Streaks
- Prevents **STAINS**
- Kills 99% Germs with daily use
- All Natural - Food Safe - Biodegradable

**WARNING!** - All cleaners over 7.5pH will **YELLOW** any lighter colored quartz product over time.

## DO

Adhere to the "CARE & MAINTENANCE ESSENTIALS" instructions contained within. They have been designed by Stone Industry Master Stonemasons who are experts in all areas especially repairs of all stone, namely quartz.

Clean your quartz EVERYDAY with STONE POWER CLEANER & clean nanoTECH cloth.

Clean CHEMICAL spills up IMMEDIATELY & NEUTRALISE with STONE POWER CLEANER. These include bleach, drain or oven cleaner, acids, batteries acid, vinegar, hard water to name a few.

Only use Stone Benchtop Cleaner products for STAINS & CLEANING of any stone or quartz. **Note:** The white spot or shadow pictured in the photo has resulted from using the incorrect cleaning products.

**ASK FOR HELP!** We 100% back our products and solutions - email us [stains@stonebenchtopcleaner.com.au](mailto:stains@stonebenchtopcleaner.com.au)

## DON'T

Do not use any cleaning products or methods NOT MENTIONED & APPROVED within.

Do not use any scrubbing pads (NON SCRATCH included).

Do not use any methods or remedies from GOOGLE, forums or other on-line sources.

Be wary of any cleaning methods recommended by STONE FABRICATORS or INSTALLERS. Sometimes they are unaware of the best way to clean and maintain your stone or quartz.

Be wary of any cleaning products or methods used, recommended, supplied, or implied by any QUARTZ MANUFACTURERS, other than the approved MANUFACTURERS outlined on our APPROVED CLEANING PAGE on our website. <https://www.stonebenchtopcleaner.com.au/approved>

Do not use any other PRODUCT or METHOD without first emailing and obtaining a written response to your inquiry. Email us @ [stains@stonebenchtopcleaner.com.au](mailto:stains@stonebenchtopcleaner.com.au)

## Our lifetime Guarantee

Only valid once your Quartz is registered within 28 days of installation with the relevant APPROVED quartz manufacturers. Only Diamond Surface Armour cleaning products are to be used for the LIFE OF THE WARRANTY (LIFETIME SURFACE WARRANTY APPLIES).

Lightly spray with STONE POWER CLEANER & gently wipe off using a figure “8” action. This is enough to keep your stone & quartz surfaces looking their best.

This helps to remove grime, germs and debris that has come in contact with the stone & quartz.

For stubborn stains spray the area and allow to stand for at least 30sec to 2 Minutes before following the above instructions.

Do not be concerned if you leave the products on the surface for a period of time as our cleaning products would have done their job without fear of damaging your stone or quartz.

Commercially available cleaning products, including some quartz manufacturers products, may cause damage to the surface over time even VOIDING your WARRANTY.

**DO NOT USE ANY OTHER CLEANING PRODUCTS**

## DAILY CARE & CLEANING

8

**TIP:** Did you know using warm soapy water adds a film to the surface overtime, making it harder to clean, dulls the surface & transfers newspaper ink readily.

# WEEKLY CARE & CLEANING

As a part of any good cleaning schedule for your home, WE RECOMMEND that you thoroughly clean the stone or quartz surfaces once a week. This serves to maintain the appearance and ease of cleaning your work surface for the life of the product. Just like regular servicing your motor vehicle it will keep your stone surfaces in pristine condition. **CLEAN, SHINING & LIKE NEW**

## TIPS

- To have continuity in color and surface finish it is important that you clean all areas of the stone including moving mats, coffee machines etc.
- If you happen to spot a mark or stain that the **STONE POWER CLEANER** has not removed, try our Spot & Stain remover with a little Gloss Review and gently rub in a circular motion with the nanoTech applicator.

# MONTHLY CARE & CLEANING

## REMEMBER TO REGISTER YOUR WARRANTY

If you have not done so by now, you will need to wash your nanoTECH cleaning cloths. Just place them in with your color load. Remember;

- NO BLEACH
- NO FABRIC SOFTENER
- NO TUMBLE DRYING

However, if you have used any of the above whilst washing the nanoTECH cleaning cloths, please email us for instructions on how to restore the cloths back to full working order.

Our nanoTECH cleaning cloths have been specially designed using the latest nanotechnology. This includes being permanently impregnated with a special stain & germ extracting compound.

Due to the nature of modern stone & quartz surfaces and how our stone & quartz cleaning products work, you will have very little to do in regards to maintenance.

Do not forget to check your levels of STONE POWER CLEANER, a bottle usually lasts 4-6 weeks. Always handy to have a refill in the cupboard for when you need it.

We would ADVISE you to order a Stone Power Cleaner REFILL twin pack as this is the cheapest way to make sure you have it at the ready for everyday cleaning.

([Purchase: on-line, Amazon](#) or via our [Distributors](#))

If you have had a couple of issues along the way that needed extra attention by using the compound cleaners, there is no need to wash the nanoTECH applicator. Just remember to only use one side for each compound product.

# ONCE A YEAR

## CHECK YOUR WARRANTY STATUS

### YEARLY CHECKLIST

- Apply Stone Gloss RENEW to all of your stone or quartz surfaces. Directions are on the bottle.
- We advise if you have accidentally chipped the edges of your stone have them repaired as soon as possible to keep your stone in pristine condition.

In order to keep your stone & quartz in PRISTINE condition some easy and simple steps will see it remain as good as when installed.

By now you will also enjoy how easy it is to keep clean and maintain using our specially formulated products. No matter what life throws at you in the kitchen, you have the answer and support from Stone Benchtop Cleaner.

We LOVE STONE and we are glad you feel the same way about your stone and ultimately your homes centre piece. For this reason we ask you to spend about half an hour of your time.

- Normally clean as you would weekly per PAGE 9.
- Apply our Stone Gloss Renew using the nanoTECH applicator on the side that you have previously applied the compound to or a clean side if you have washed it recently (add a few extra drops to prime applicator again)
- Simply work a few drop into the surface in a circular motion until it has vanished section by section.
- Just wipe over with a clean nanoTECH cleaning cloth

That will see your stone looking its best for another 12 months.

# COMMON STAINS

99% of all stains to any QUARTZ or Stone brand in any finish, can be removed with a simple spray with STONE POWER CLEANER & gently wipe off using a figure "8" action.

This includes common spills, messes and mishaps such as;

- Oils - Coconut, Olive, Vegetable etc.
- Lip-gloss, Vaseline, even nail polish that has not dried.
- Crayon, Biro, Pens and markers. Some may need a longer application or a reapplication.

For more detailed instructions on various or tougher stains refer to the label on the particular bottles, cleaning kit box or

[www.stonebenchtopcleaner.com.au](http://www.stonebenchtopcleaner.com.au)

## BEETROOT & SPICES

Wipe up immediately with the nanoTECH cloth. Flip the cloth over to a clean side. Lightly spray with STONE POWER CLEANER & gently wipe off using a figure "8" action.

For set stains that have dried overnight, simply spray with the Stone Power Cleaner. Allow to stand for 30sec - 2mins gently wipe off using a figure "8" action.

A reapplication may be need if it is a large amount of grime or has set for a few days.

## COFFEE & TEA

Wipe up immediately with the nanoTECH cloth. If the coffee or tea has dried, simply spray with the Stone Power Cleaner. Allow to stand for 30sec - 2mins and gentle wipe off in a figure "8" action using the nanoTECH cloth.

## TOTAL SOLUTION

We offer a total solution for caring for every stone type, brand and finish. Our products have been used and tested by stone industry professionals and are now available for the general public.

NON DAMAGING - NON ACIDIC - SAFE

SAFE TO USE ON ALL TYPES OF STONE

**NO EXCEPTIONS**

## MATTE FINISHES....

also known as Matt, Leathered or Honed surfaces, is the finish applied to the stone or quartz surfaces. With quartz the finish is mostly a honed finish created from the in-line polishing process to around 800-1200grit.

A true Leathered finish is achieved with antiquing brushes and/or flaming in the case of granites.

For this reason the surface micropores are not as shallow as they are in polished surfaces. How shallow or not give the ascetic of Gloss (shallow) Matte (not so) and the light reflectivity.

The more shallow, the more light is reflected and the shiner or more polished the surface appears.

What does this mean for cleaning and stains?

The pores tend to catch grime & contaminations, making these types of surfaces more problematic. Therefore it is essential that the correct cleaning products are used.

Stone POWER CLEANER makes cleaning these surfaces a breeze. Giving you piece of mind.

- ✓ Cleans, Remove Stains & Protects with the same ease and effort as any Gloss surface.
- ✓ Removing STAINS is a breeze with our cleaning products. Simply spray with STONE POWER CLEANER & gently wipe off using a figure "8" action for a perfect clean, streak free matt surface
- Being different does not mean things have to be any harder.
- ✓ For any stain or cleaning situation, just follow the instructions within the Care & Cleaning Essentials booklet.
- ✓ Caring for your Matte surface is no different than caring for any other stone. The cleaning instructions are EXACTLY the same when you use our products.

# COMMON STAINS

We have provided specific instructions for some of the most common stains that most households will encounter.

If for whatever reason the stain DOES NOT remove as per the specific instructions, please email our technical department at [stains@stonebenchtopcleaner.com.au](mailto:stains@stonebenchtopcleaner.com.au) or visit our website [www.stonebenchtopcleaner.com.au](http://www.stonebenchtopcleaner.com.au)

We 100% stand behind our products and guarantee that you will find them just as easy to use as our videos and instructions, so much so we offer a 100% money-back guarantee\*.

On selected/approved Quartz manufacturers products we offer a "LIFETIME\*" warranty.

Stain	Product	Method
General Cleaning	Stone Power Cleaner® nanoTECH cleaning cloth Technistone Orange Cleaner®* Isopropyl alcohol* Glitz Stone Benchtop Cleaner®* Method Daily Granite Cleaner®*	Follow the <a href="#">Care &amp; Cleaning Essentials</a>
Oils - edible Sunscreen Lip Gloss Petroleum Jelly	Stone Power Cleaner®	1) Wipe the area with clean kitchen or paper towel to remove any excess oil/s 2) Lightly spray with the Stone Power Cleaner and allow to stand for 30 secs - 2 minutes. 3) Clean with a gentle figure "8" action using a clean nanotech cloth. 4) Repeat if necessary.
Cup rings	Stone Power Cleaner® Stone Gloss Renew®	1) Lightly spray with the Stone Power Cleaner and allow to stand for 30secs. 2) Clean with a gentle figure "8" action using a clean nanotech cloth. 3) Repeat if necessary and added a few drops of Gloss Renew and mix into Stone Power Cleaner. Allow to stand for 30secs - 2 minutes. <b>NOTE:</b> that are caused by hard water or where high Total Desolved Salts (TDS / ppm) are above the recommended average for portable water. It is advised you <a href="#">see our you-tube channel</a> for the instructional video.

\* Notes, that these products may not remove all stains, marks and other containments. Only Stone Power Cleaner is know and/or be thoroughly tested all Quartz brands, color and finishes.

\* Cup ring, glass rings are generally a caused by a build up of residues from using the incorrect cleaning products. Stone Power Cleaner & the nanoTECH cleaning cloth are known to return the Quartz surface free of these contaminations.

Stain	Product	Method
Dull No Shine	Stone Power Cleaner® Stone Gloss Renew®  <b>* Dull or no shine are generally a caused by a build up of residues from using the incorrect cleaning products. Stone Power Cleaner &amp; the nanoTECH cleaning cloth are known to return the Quartz surface free of these contaminations.</b>	<ol style="list-style-type: none"> <li>1) Lightly spray with the Stone Power Cleaner and allow to stand for 30secs.</li> <li>2) Clean with a gentle figure "8" action using a clean nanotech cloth.</li> <li>3) Repeat if necessary and added a few drops of Gloss Renew and mix into Stone Power Cleaner. Allow to stand for 30secs - 2 minutes.</li> </ol> <p><b>NOTE:</b> that are caused by hard water or where high Total Desolved Salts (TDS / ppm) are above the recommended average for portable water. It is advised you <a href="#">see our you-tube channel</a> for the instructional video.</p>
Rust Yellow stains that are NOT round or partly round	Stone Power Cleaner® Stone Gloss Renew®  <b>* Yellow or yellow-brown stains that appear as a circle or part of a circle that DO NOT remove or partly remove after following the instructions across. Please email our technical department for further help before trying ANYTHING ELSE.</b> <a href="mailto:stains@stonebenchtopcleaner.com.au">stains@stonebenchtopcleaner.com.au</a>	<ol style="list-style-type: none"> <li>1) Wipe the area free of stone dust or any other abrasives with a dry clean nanotech cloth.</li> <li>2) Lightly spray with the Stone Power Cleaner.</li> <li>3) Apply Stone Gloss Renew as directions on bottle and mix with Stone Power Cleaner to cover the stain.</li> <li>3) Allow to stand for 2mintes.</li> <li>3) Clean with a gentle figure "8" action using a clean nanotech cloth.</li> <li>4) Repeat if necessary.</li> </ol>
Spices Flower pollen	Stone Power Cleaner® Stone Stain & Spot Remover®	<ol style="list-style-type: none"> <li>1) Lightly spray with the Stone Power Cleaner and allow to stand for 30secs.</li> <li>2) Clean with a gentle figure "8" action using a clean nanotech cloth.</li> <li>3) Repeat if necessary and added a few drops of Stain &amp; Spot remover and mix into Stone Power Cleaner. Allow to stand for 30secs - 2 minutes.</li> </ol>

Above is the result of trying to remove a simple stain (pen or ink see Page 17 for instruction on this stain removal). What was a line of ink that was no more than 20mm (1") long is now damage to a vast majority of the worktop.

#### Why the extent of damage?

After consulting and initially finding our specialized information via Google, they choose to go with "WIFES TALES" contained within may forums on the Internet, even consulting with a teenager from the local hardware/supermarket on what was BEST TO USE. After the damage was done they contacted us hoping for our products would reverse the damage, but the damage was done.

Whilst repairable a \$20 fix has become hundreds of dollars.

Stain	Product	Method
Coffee Tea Cordial Fruit Juice	Stone Power Cleaner® Stone Stain & Spot Remover®	<b>1)</b> Lightly spray with the Stone Power Cleaner and allow to stand for 30secs. <b>2)</b> Clean with a gentle figure "8" action using a clean nanotech cloth. <b>3)</b> Repeat if necessary and added a few drops of Stain & Spot remover and mix into Stone Power Cleaner. Allow to stand for 30secs - 2 minutes.
Drain cleaner Oven cleaner Lye High pH cleaners Acid based cleaners	Stone Power Cleaner® Stone Stain & Spot Remover®	<b>1)</b> Lightly spray with the Stone Power Cleaner and allow to stand for 30 secs - 2 minutes. <b>2)</b> Clean with a gentle figure "8" action using a clean nanotech cloth. <b>4) MUST REPEAT.</b> <b>5)</b> Repeat again with the additional of a few drops of Stone Stain & Spot remover mixed in to STEP 1.
Super Glue Adhesives Tape	Utility Razor Blade Stone Power Cleaner® Stone Stain & Spot Remover®	<b>1)</b> Remove the excess by using a razor blade in the same way that you would finish a seam/join. Wipe the area free of stone dust or any other abrasives with a dry clean nanotech cloth. <b>2)</b> Lightly spray with the Stone Power Cleaner and allow to stand for 30secs. <b>3)</b> Clean with a gentle figure "8" action using a clean nanotech cloth. <b>4)</b> Repeat if necessary. <b>NOTE:</b> for stubborn marks use Stone Stain & Spot Remover as directions on bottle.

Bottom photo is damage from high pH cleaners not being NEUTRALIZED.

**NOTE:** Water WILL NOT neutralise most high or low pH cleaners or cleaning products. The damage especially can occur from any product pH >8

If the issue is Super Glue or any other CA adhesive it will need to be allowed to stand overnight with Stone Power Cleaner moisten the area. Cover the area with cling-wrap. Trying other methods may result in the damage shown in the bottom photo.

If this does not remove the super glue please contact us.

Bottom photo is damage from high pH cleaners not being NEUTRALIZED.

**NOTE:** can occur from any product pH >8

**EMAIL:** [stains@stonebenchtopcleaner.com.au](mailto:stains@stonebenchtopcleaner.com.au)

\* Notes, that these products may not remove all stains, marks and other containments. No lifetime warranty available with use of these products.

Right, Below is a list of Approved and NON-Approved cleaning product for the use of caring for, stain removal, cleaning and general maintenance of all stone and especially Quartz. NOTE the products with a "\*" may not remove the stains partially or totally.

**WARNING!** - The list across is only SOME common NON-APPROVED cleaners - See our website

Stain	Product	Method
Pen Crayon Biro Permanent Marker Laundry Marker Niko	Stone Power Cleaner® Stone Gloss Renew®  Technistone Orange Cleaner®* Isopropyl alcohol* Glitz Stone Benchtop Cleaner®* Method Daily Granite Cleaner®*	<b>1)</b> Wipe the area free of stone dust or any other abrasives with a dry clean nanotech cloth. <b>2)</b> Lightly spray with the Stone Power Cleaner. <b>3)</b> Apply Stone Gloss Renew as directions on bottle and mix with Stone Power Cleaner to cover the stain. <b>4)</b> Allow to stand for 2mintes. <b>5)</b> Clean with a gentle figure "8" action using a clean nanotech cloth. <b>6)</b> Repeat if necessary. <b>NOTE:</b> the longer this types are stains are left the most the penetration into the surface. Thus may require to allow to stand overnight. We recommend covering the area and the compounds in cling film to stop drying out.

# THE ONLY SOLUTION ALL IN ONE BOX

We have spent the last 14 years perfecting the formulas and our products effortlessly remove all stains\* from any modern stone surfaces including all brands of quartz such as;

- Technistone
- Silestone
- Caesarstone
- Quantum Quartz
- Smartstone
- Quantra
- Samsung
- LG
- Trendstone
- Cambria
- Quartzforms
- Granite, Marble, Quartz - all brands

Our product WORK. They are the same products we use on a daily basis for all our specialised repairs and removal of stains.

Many have said that we are MAGICIANS when it comes to restoring, caring for & maintaining ANY STONE SURFACE. The secret is we fully understand any stone, how it's formed, how it reacts, how to restore its beauty. Some people have a calling and ours is STONE. This is why we stand 100% behind all our products with our after-sales service and technical support.

## Tips & Hints

Do NOT use any other products other than the ones outlined within. For a full list of approved products on our website

[Updated Monthly @ Approved Products](#)

## POWER CLEANER

- Active compounds are the main ingredients - NOT WATER
- A little goes a long way. Use sparingly
- With everyday cleaning one bottle should last 3-6 weeks.

Available through all our Distributors.

### INSTRUCTIONS

Lightly Spray the surface or stain.  
Leave to activate for 30sec-2minutes.  
Using a gentle figure "8" action wipe off with the nanoTech cloth.

**KEEP A REFILL PACK ON HAND**

## POWER PACK

- Gentle for everyday use.
- Most POWERFUL stone & quartz spray cleaner on the market.
- Best for Cleaning any stone.
- True pH Neutral.
- Totally STONE & QUARTZ SAFE.
- 100% Natural & biodegradable.
- Will NOT VOID warranties.

### INSTRUCTIONS

Lightly Spray the surface or stain.  
Leave to activate for 30sec-2minutes.  
Using a gentle figure "8" action wipe off with the nanoTech cloth.

**#1 STONE & QUARTZ CLEANER**

## CLEANING KIT

### Everything you will ever need for;

- Everyday Cleaning
- Streak free SHINE
- STAIN removal
- TOUGH stains
- ALL care & maintenance
- Matte or Polish finishes

With all our products, they are designed to work! They are full concentrates of the same products our master stonemasons have been using for years. Remember - a little goes a long way.

See our website, the box & labels for full instructions & step by step videos to get the best results from our products.

**101 SOLUTIONS - 1 BOX**

## nanoTECH CLEANING

- Latest nanoTECHNOLOGY
- Permanently impregnated with a special grime, germ & stain lifting agent.
- Highly RECOMMENDED to be used with our STONE POWER CLEANER for maximum cleaning & stain removal results.

### CARE INSTRUCTIONS

Machine wash for best results with your color load.  
NEVER add fabric softener or tumble dry.  
Wash your nanoTECH cloth regularly.

**NOT A ORDINARY MICROFIBER**

**STONE BENCHTOP** CLEANER

*Love your Benchtop Again*
